Providing services to enhance Your
Reach and capacity*

4PL Solutions

Bernekon DMCC's 4PL Solutions are designed for customers seeking to outsource downstream fulfillment management and improvement – without the challenge of managing multiple logistics service providers (LSPs). By serving as the single point of contact between customers, their LSP networks and vendors, we significantly lower costs and drive sustainable value.

4PL Solutions improves supply chain performance and adds value through:

- **Reduced Total Cost of Ownership (TCO)** of transportation goods and services via continuous improvement / cost-reduction initiatives
- **Establishment of strategic partnerships** with qualified suppliers by leveraging 4PL Solutions' global logistics capabilities and integration of technologies and providers
- **Consistent performance management across various 3PLs** driven through 4PL Solutions' standardized and synchronized processes and systems
- **Leverage technologies and logistics tools** of strategic suppliers provided through 4PL Solutions' extensive suite of logistics applications and technology integration solutions

4PL global downstream management provides tailored solutions to most of the world's largest and most respected companies:

- **Supply Chain Design** – identifying improvement opportunities and arriving at optimal design through analyzing variables associated with optimizing networks
- **Supply Chain Execution Management** – planning, coordinating and overseeing all operational and day-to-day activities of the customers' extended supply chain
- **Supply Chain Monitoring** – driving continuously improvement through the management, visibility and monitoring of integrated supply chain information and key performance indicators, identified cost and service objectives

4PL Services include:

- **Supply Chain Visibility and Proactive Event Management** – end-to-end supply chain visibility and systematic monitoring of integration of data from multiple providers and system performance
- **KPI Management** – development of operational KPIs linked to customers' specific goals, along with ongoing monitoring through regular scorecard reviews and reports
- **Continuous Improvement** – identification and implementation of ongoing cost reduction and service improvement opportunities

New LCL Concept – send Your shipments to Umm Qasr from Jebel Ali 4 times a week in 20’ and 40’ Containers

Cost Effective

Our **LCL Service** to Umm Qasr Iraq from Jebel Ali UAE provides our customers the option to reduce their costs in sending their shipments with the lowest cost impacted Sea Freight by selecting their exact load capacity. Compared with others such as Airfreight or Land Freight - LCL has a clear advantage.

Reliable

Our customers now can benefit with total **4 Days** from Door to Port UAE to Umm Qasr Iraq. With 4 departures a week and 2 days of transit time, the service and reach has a high reliability that's supports planning operations more accurately.

Secure

Our customer's cargo packed in **Versatile Crate Boxes (VCB)** to secure maximum safety during transportation and handling at both ends against damages and losses. Our VCBs are marked and safely stored at the Umm Qasr Iraq port for easy identifications and handling instructions.

Efficient

Compared with other mode of transportation, our LCL Service proves to be efficient from a perspective of **Cost, Time & Workload**. More benefits for our customers - the free storage times at the ports, transit and import formalizes at customs, and packages without consideration of safety and security.
